Summary

Senior Software Engineer with 5+ years of experience building scalable and configurable web applications using Node.js/Express, PostgreSQL, React, and Angular. Skilled in designing RESTful APIs, architecting cloud-ready solutions, and mentoring teams. Passionate about writing clean, maintainable code and driving technical excellence.

Core Skills

- Languages & Frameworks: Node.js, Express.js, React, Angular, Ionic, TypeScript, PHP (Laravel), C# .NET
- Databases: PostgreSQL, MySQL, MongoDB
- Cloud & DevOps: Google Cloud Platform, Linux servers, Docker, CI/CD pipelines
- Other: GraphQL, REST APIs, Socket.io, Redux, Figma, KaTeX/LaTeX, Agile/Scrum

Experience

Software Engineer – Xtract360 (Remote, Nov 2024 – Present)

- Developing and maintaining a highly configurable enterprise application using Node.js/Express, PostgreSQL, and React.
- Designing and optimizing REST APIs for scalability and performance.
- Collaborating with cross-functional teams to deliver new product features and integrations.
- Contributing to architectural decisions and mentoring junior developers.

Angular Software Engineer – Andela - Irembo (Remote, Jan 2025 – May 2025)

- Irembo: Implemented new UI features and workflows to help the core team meet their deadline for product delivery. Worked across a number of products and portals including IremboGov, IrempoPay, Clients portal and the UI library. This was strictly 3 months contract

Software Engineer – Teknika Corp (Remote, Jun 2024 – Nov 2024)

- Built and optimized client-facing features using Angular, Node.js, C# .NET, and Laravel.
- Improved MySQL queries to boost performance.
- Collaborated with distributed teams to deliver multi-stack solutions across industries.

Software Engineer – DEJ (Remote, Nov 2023 – Jun 2024)

- MathMint: Implemented advanced UI logic in Angular, rendering mathematical equations with KaTeX and interactive event handling.
- Drehpunkt: Developed wind farm monitoring mobile app using Ionic Angular.
- CareCompass: Enhanced healthcare app usability with new features and bug fixes.

- Premind: Deployed apps on Linux servers (DevOps task).

Fullstack Software Engineer – LevelTen Energy (Remote, Feb 2020 – Oct 2023)

- Developed configurable renewable energy solutions with Node.js, Angular, and PostgreSQL.
- Designed scalable backend infrastructure and dynamic frontends.
- Contributed to tools supporting renewable energy procurement.

Frontend Engineer – Retavo (Techstars '22) (Remote, Nov 2022 – Jun 2023)

- Built scalable web apps in Angular, consuming REST APIs.
- Improved frontend architecture and mentored junior developers.

Frontend Consultant – Master WiZR (Remote, Oct 2020 – Feb 2022)

- Delivered responsive web applications in React.
- Supported backend development with Node.js and MongoDB.

Software Engineer – Andela (Nov 2018 – Mar 2020)

- Delivered software for global clients using JavaScript frameworks in distributed teams.
- Gained strong experience in Agile and remote collaboration.

UI/UX Developer – Blossom (Remote, Jan 2020 – Mar 2020)

- Enhanced UI/UX with React/TypeScript and Flask APIs.

Frontend Developer (Apprentice) – Tulaa (Remote, Feb 2019 – May 2019)

- Supported development of responsive Angular applications.
- Implemented new features, bug fixes, and participated in code reviews.

Education

Bachelor of Science in Computer Software Engineering
Makerere University, Kampala | Aug 2014 – Apr 2018

Highlights & Achievements

- Built a highly configurable application at Xtract (Node.js/Express, PostgreSQL, React).
- Contributed to renewable energy software at LevelTen Energy, helping businesses adopt clean energy.
- Worked with clients across the US, Europe, and Africa in remote, agile environments.
